

Mast Shift

Fast, accurate post placement

Slides the mast across the beam while the feet stay put, for fast, accurate post placement, especially with a rearshift, sidemount or rotating base.

FEATURES

- Mast moves across the beam while the feet stay put
- Works with rearshift, sidemount and rotating bases
- UltraGlide version runs on plastic slides

SPECIFICATIONS

Standard	250 mm travel, 90 kg (Mule and Mule V)
UltraGlide	350 mm travel, plastic slides
