

REGENER8R LX600

THE LAST CHAIN HARROW & LEVELLER YOU'LL EVER NEED TO BUY

The NEW Hustler Regener8r Chain Harrow will improve your pasture productivity, manure uptake and your bottom-line. The 4 rows of double side fabricated steel agitators (that don't shatter at the sight of the first pebble) provide a superior bite and more consistent spread with thorough pasture harrowing / aeration and the triple levelling bars leave an amazing finish! Can also be used for covering seed and cultivation finishing.

Oversized Tough Frames

We switched from round tubes, to RHS sections and went oversize (80x40x4mm) to save you from wasting time back to the shop for welding or replacement.

Unique Individual Folding

Left and right folding is individual, so that you can operate with one or both sides up giving more versatility.

8mm Levelling Bar

Achieve More Everyday! The Integrated Bended 8mm Levelling bar means you can achieve 2 applications in one pass.

New Strengthened 3PH Headstock Design

Prevent breakages, plus faster and easier hitching thanks to our unique lower hitch guides, and extra-long slot for more floatation and better contour following.

Foldable Frame

Foldable 3PL frame and harrow for efficient space utilisation in storage and transport. With built in hydraulic Lock-valves for added safety when travelling on the road.

Large Skids

Our extra-large skids protect the centre and wing sections of the harrow from sinking or digging in, in soft ground for a better finish.

Bushed Pivots

We've designed Regener8r with bushed pivots that can easily be replaced if ever needed so you're not needing to replace a whole wing after a few years work.

Dual Sided Teeth

One side is more aggressive than the other - flip the matt over depending on your preference. And get twice the lifespan, flip the matt when worn out!

Galvanized GE Frames

For longevity in corrosive applications, we have galvanised the ground engaging frames for peace of mind and wear resistance.

4 Tooth Rows

The 4 Tooth Row Harrow results in higher agitation and a more efficient harrow operation.

Indestructible Teeth

Unique fabricated steel teeth (which don't shatter) made from RockGuard™ 400 (AR400) wear plate teeth for extreme wear resistance to ensure you're not wasting time in the workshop replacing teeth.

Larger Chain Rings

14% stronger rings than others and our unique design allows for changing out teeth without needing to cut, bend and reweld rings.

**5 YEAR
WARRANTY**

5 Year warranty

Backed by Hustler's legendary 5 year warranty and customer support.

SPECIFICATIONS

UNIT WEIGHT: 724 kg | 1596.15 lbs

DIMENSIONS(OPEN): 2100mm x 6000mm x 1060mm | 82.6" x 236.2" x 41.7"

DIMENSIONS(FOLDED): 2100mm x 2000mm x 2220mm | 82.6" x 78.7" x 87.4"

HYDRAULIC REQUIRED: 15L/min | 3.96 gal/min
